

We collectively and individually can only work toward the horizons on our mental radar at a point in time

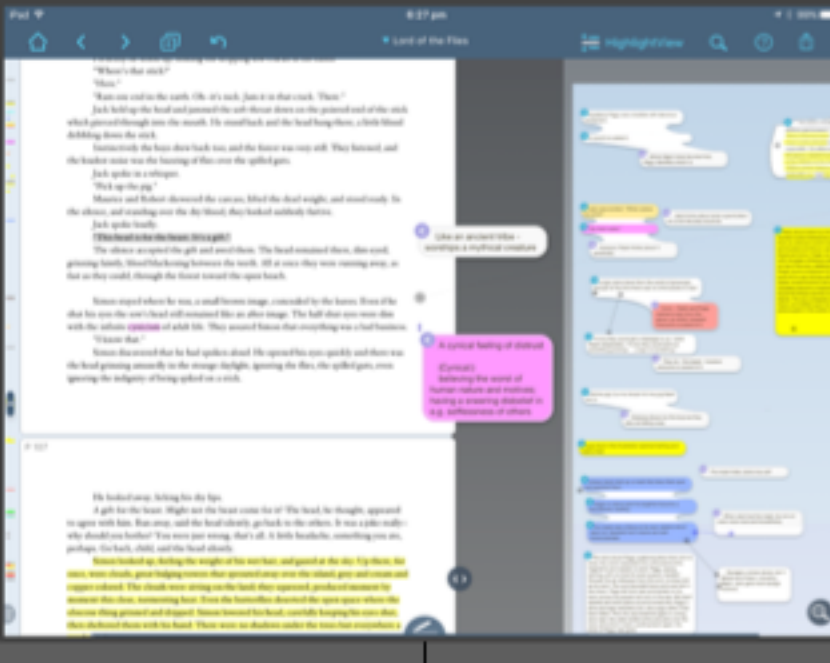

"We surely are nowhere near the end of the turbulences, the transformations, the sudden upsets, which have made this century one of the meanest, cruelest, bloodiest in human history" – Peter Drucker

"The twenty-first century will surely be one of continuing social, economic, and political turmoil and challenge, at least in its early decades.

The Age of Social Transformations is not over yet.

And the challenges looming ahead may be more serious and more daunting still than those posed by the social transformations that have already happened, the social transformations of the twentieth century" – Peter Drucker

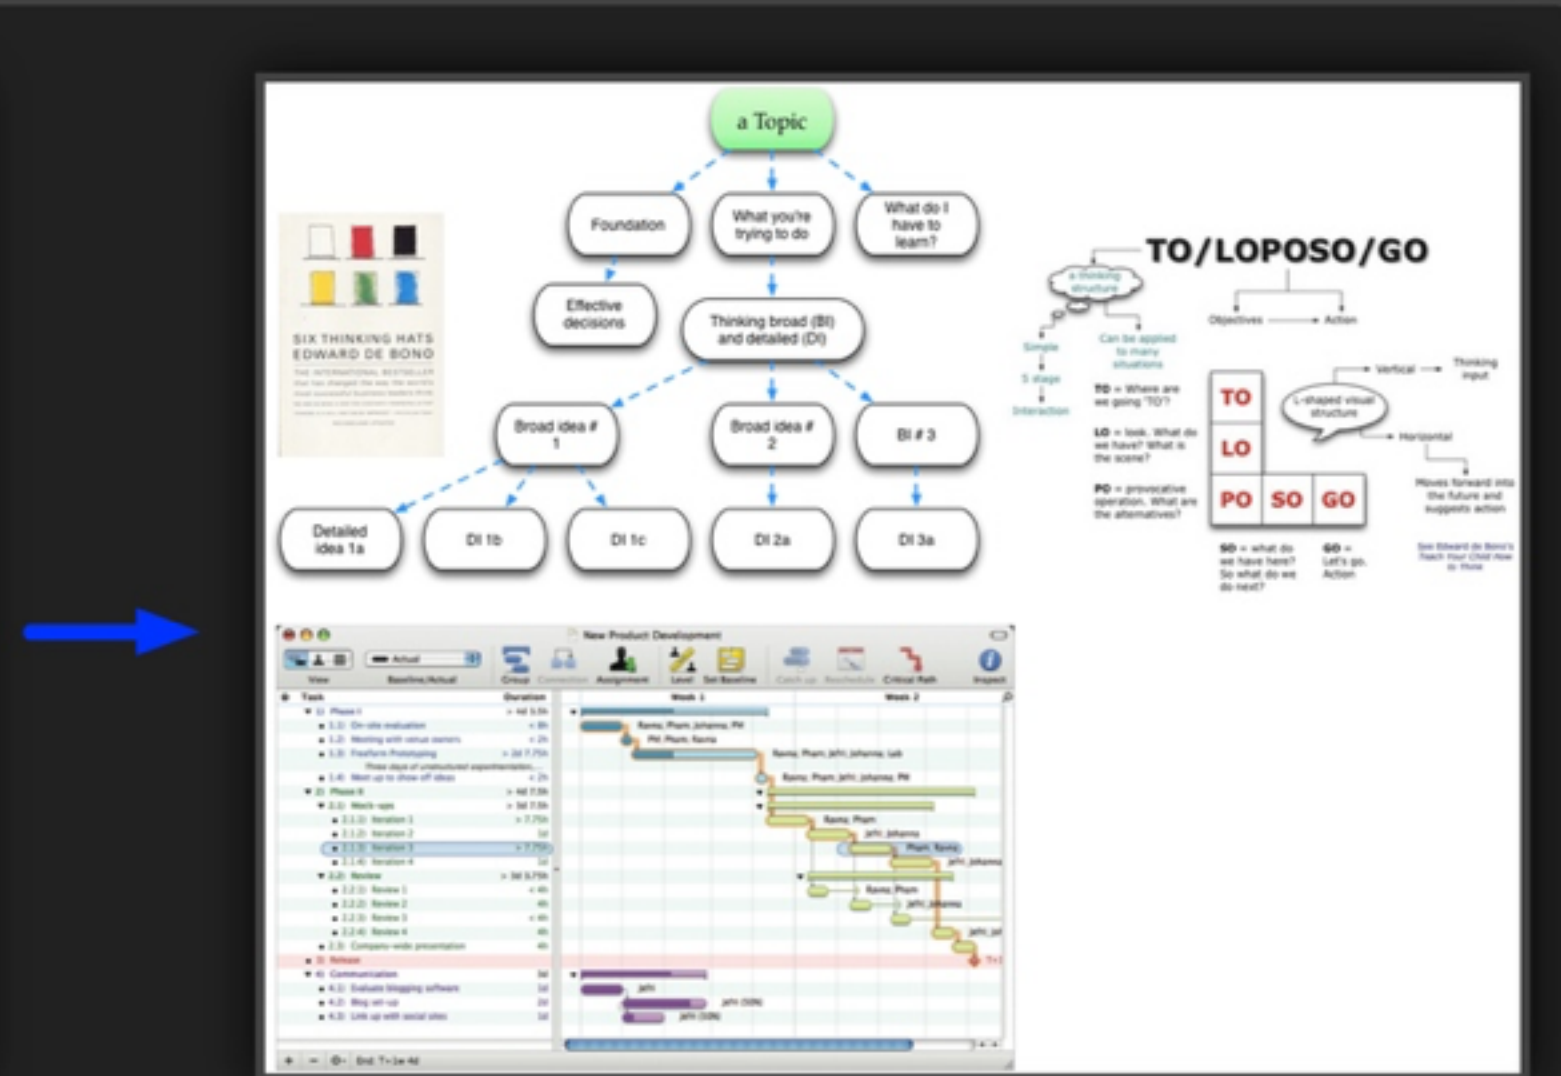

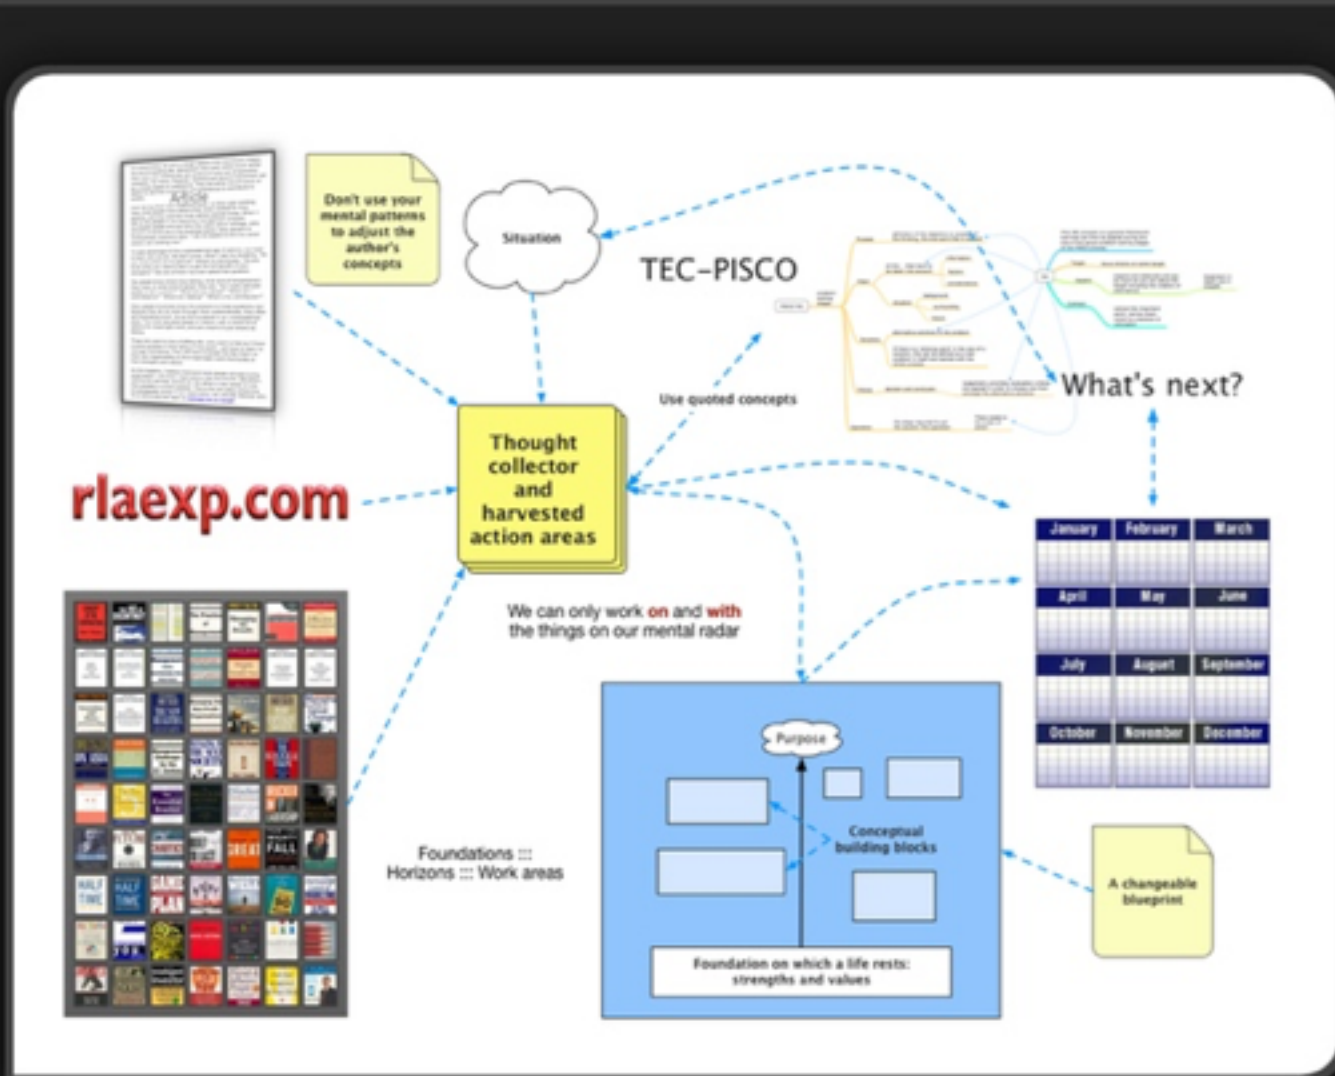

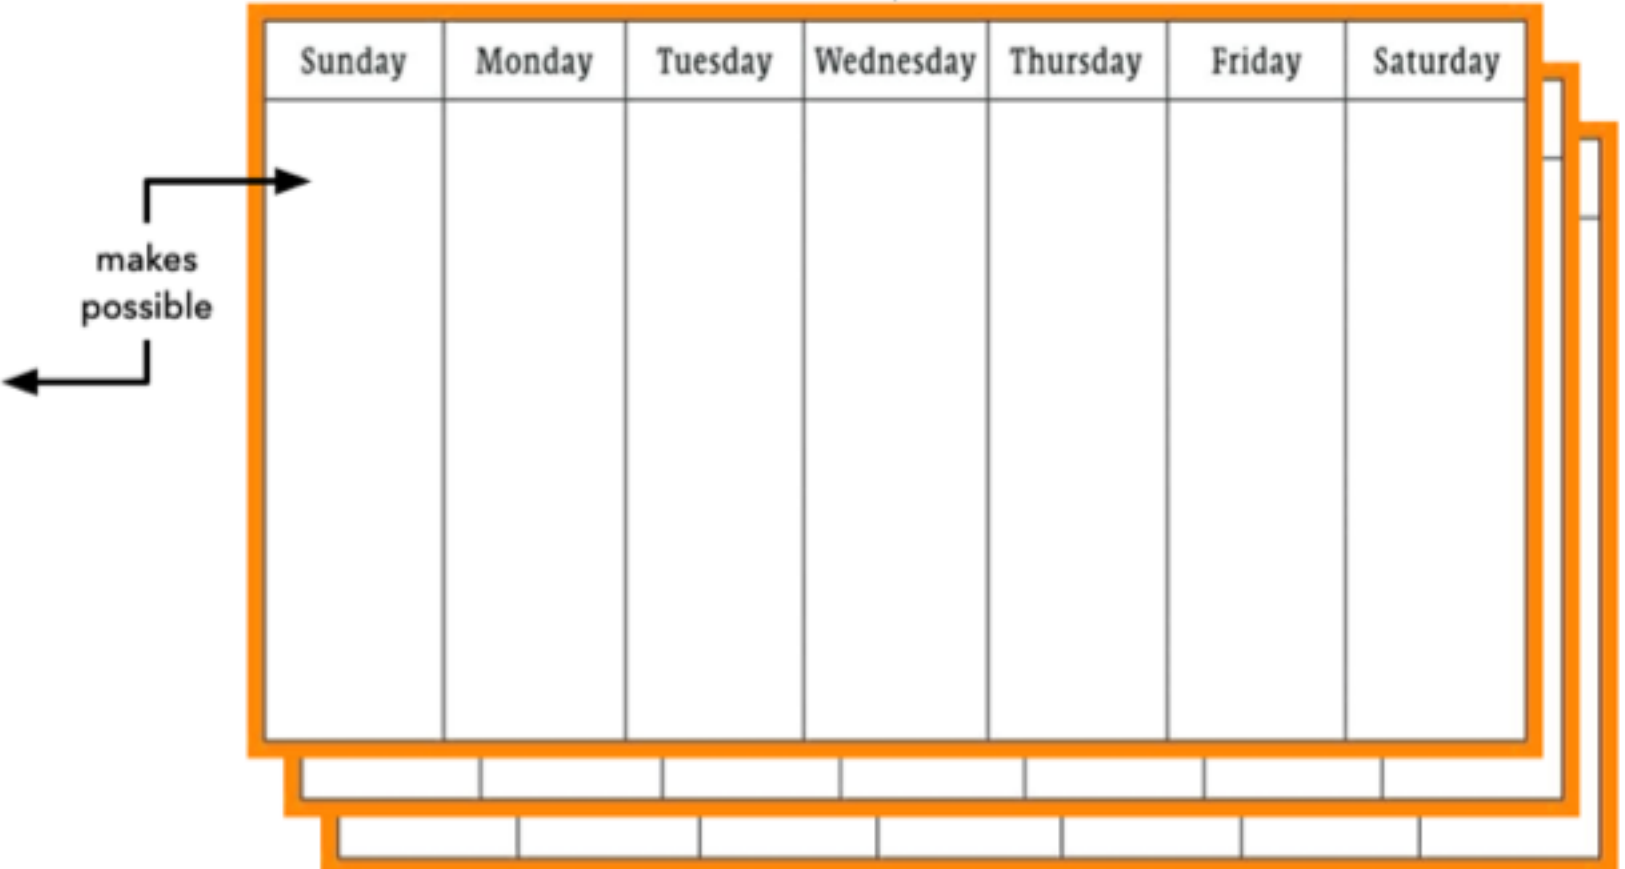

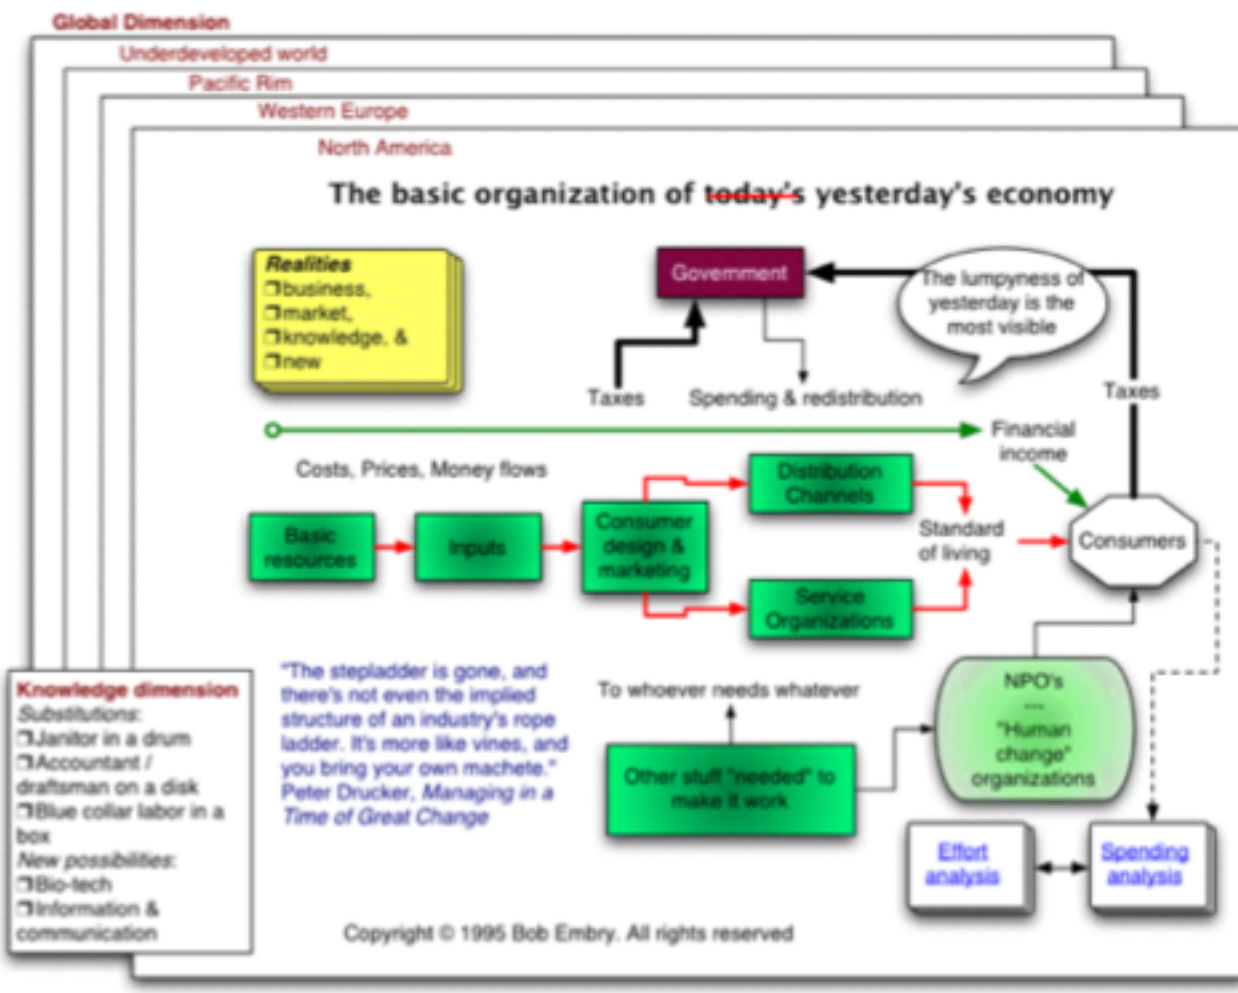

Henry Jones' Grail diary guided his thoughts and actions.

From concepts to daily action

A static view of the economy

Content and structure of the economy – a launching pad toward tomorrowS

Individual time log and calendar. Things a person did and things they are going to do – horizonS.
